

Curriculum Vitae

1. Personal Information

- First Name: Mahesh
- Last Name: Choolani
- Position: Head, Department of Obstetrics and Gynaecology
- Organisation/Institution: National University of Singapore
- Country: Singapore

2. Short Biography

Associate Professor Mahesh Choolani heads the Obstetrics & Gynaecology Department at the National University Health System (NUHS), Singapore, where he is a Senior Consultant in Maternal Fetal Medicine. He was recently appointed Co-Director of the National University Centre for Women and Children (NUWoC), Singapore. Internationally, he serves as the President of the International Society for Prenatal Diagnosis (ISPD) and the President-at-Large of the International Fetal Medicine and Surgery Society (IFMSS). Regionally, A/Prof Choolani is the newly appointed Chairman of the Medical Association of South-East Asian Nations (MASEAN) Group of Journals Board, and in Singapore, he is the President of the College of Clinician Scientists (CCS), Academy of Medicine, Singapore (AMS).

With a research career that has spanned over three decades, A/Prof Choolani has published over 230 peer-reviewed papers, has an h-index of 60, and his research has been cited over 12,000 times. He has attained more than \$20 million in grant funding during his research career. A/Prof Choolani has received several prestigious awards in recognition of his significant contributions to the field of Obstetrics and Gynaecology, including being the first person to be awarded the Benjamin Henry Sheares Memorial Lecture twice, first in 2009, and then in 2023. He is the recipient of the National Medical Research Council Clinician Scientist Awards in 2009, 2014, and 2021. For his contributions to clinical and translational research, A/Prof Choolani was recently awarded the National Outstanding Clinician Scientist Award by the Ministry of Health, Singapore, in 2023.

3. Field of Interest or Research

A/Prof Choolani is a strong advocate for translational medicine, and his research interests are wide, ranging from maternal fetal medicine, to ovarian cancer biomarker, and more recently to artificial intelligence.
